Projects

EasyVote | [Link](#)

- Online Voting System EasyVote is an online voting platform featuring a user-friendly interface developed with Node.js, HTML, CSS, and JavaScript. It ensures a seamless voting experience through responsive design and leverages Node.js for server-side rendering. Explore the project at- easyvote.onrender.com

User Friendly Calculator Using Python

- A Python Calculator is a console-based application that allows users to perform basic arithmetic operations, such as addition, subtraction, multiplication, and division. This project provides a user-friendly interface where users can input mathematical expressions and receive the corresponding results.

Internship

Data Analytics Virtual Internship | AICTE Eduskill

May 2023 - July 2023

The internship provided the opportunity to learn and apply data-driven methodologies in real world projects. The experience helped to expand the intern's knowledge of data analysis and reinforced their commitment to using data to make informed decisions.
